Dear Hiring Manager,

I am writing to express my strong interest in the Senior Fullstack Developer (Front-End Focused) position at Lean Tech. With 8+ years of experience specializing in React, TypeScript, and performance optimization, I am excited about the opportunity to contribute to your mission of delivering exceptional nearshore solutions.

Your focus on Core Web Vitals optimization resonates deeply with my experience. At 99.co, I reduced LCP from 4.5s to 1.2s (73% improvement) while maintaining industry-leading FID and CLS metrics. This achievement, combined with my WordPress development experience at Mirum Agency, aligns perfectly with your WordPress-VIP content publishing workflow requirements.

At PropertyScout, I architected frontend features using React and TypeScript while collaborating with cross-functional teams—exactly the collaborative approach Lean Tech values. My build tool optimization expertise (50% build time reduction through Webpack configuration) and experience integrating REST APIs and GraphQL demonstrate the technical depth you're seeking.

I am particularly drawn to Lean Tech's emphasis on mentorship and professional development. Throughout my career, I've conducted knowledge-sharing sessions, established coding standards, and mentored developers—contributing to team growth while maintaining high-quality code through automated testing and code reviews.

As someone currently working remotely from Bangkok with experience collaborating across time zones, I'm well-prepared to contribute effectively to your distributed team and support your Latin American clients.

I would welcome the opportunity to discuss how my performance optimization expertise and full-stack capabilities can contribute to Lean Tech's continued success.

Thank you for considering my application.

Best regards,

Kenni Gandira Alamsyah
